Principal Activities

MMH Holdings Limited (the 'Company') is the parent company within the MMH Group of Companies (the 'Group') which provides specialised services to the marine oil and gas industries. The Group caters for the specific requirements of drilling contractors and their service providers with services ranging from manpower planning, project requirements, contracting of pre-screened and qualified personnel for the offshore/onshore oilfield industry, training of personnel, logistics, supply chain solutions, project management, rig agency services and rig stop services and facilities.

Directors' report - continued

Review of the Business

The principal focus and activity of the Group, has been the development of a site measuring almost 170,000m² in Malta's Grand Harbour formerly known as the Marsa Shipbuilding Site, to serve as a regional hub for the provision of the group's shore-based services and facilities (hereinafter the 'Mediterranean Maritime Hub' or the 'Site/Hub'). Following a public deed published on 1st August, 2016, the Company took full possession of this Site, and leased it in full by title of lease to the key operating company within the Group: MMH Malta Limited. The Site is currently under redevelopment and rehabilitation.

The Company recognises that one of the key risks and uncertainty of the business of the Group is chiefly that posed by the current performance of the oil and gas industry. In 2020 – and carrying on into 2021 – the COVID-19 pandemic affected the global maritime and oil and gas industry, and by consequence poses a risk to the Group's performance. The price of OPEC oil for 2020 reached unprecedented lows due to oversupply and fears of storage. Whilst the pandemic and record low prices shook the industry, the price stabilised toward the end of the year and by Dec 2020 crude oil stood at USD 54 per barrel (OPEC) and USD 42 per barrel (BRENT) (source: www.statista.com).

The operations of the Group are effected chiefly by MMH Malta Limited, which is a fully owned subsidiary of the Company. As such, the Company's performance is closely tied to the performance of MMH Malta Limited and the Group as a whole.

During the year under review, the Group primarily focused its operations on mitigating the impact caused by the COVID-19 pandemic. This was achieved by increasing efforts to attract work in the local market whilst incessantly pursuing international major oil and gas projects. Development in the Hub slowed down during the year in review, in order to conserve cash flow due to the uncertainty behind the effects of the pandemic. Despite the pandemic and the effect this had on the operations of the Group, the investment within the Hub continued and during the year under review this amounted to €887,000, consisting mainly of investment in plant and machinery and improvements to property. The total investment by the Group in the Hub at cost at end of 2020 reached €26 million.

The efforts to attract major oil and gas projects to the Hub continued through the year under review and yielded results. Indeed, in the final quarter of 2020, the Group managed to host a rig stop. The Group also qualified to bid for offshore oil and gas projects that are anticipated to commence in 2022.

The effects of the COVID-19 pandemic impacted all players in the Oil & Gas industry, and some clients of the Group even substantially reduced the number of people engaged. In addition, the travel restriction that were imposed further limited the movement of personnel. These measures have had a significant effect on the revenue generated by the personnel recruitment and logistics functions within the Group. Notwithstanding, due to the Group's diverse workforce and its ability to adapt quickly to the realities and the ever-changing environment in which it operates, personnel were successfully placed on local projects and a smaller number were located abroad.

The Group's strong efforts in diversifying its revenue streams in 2019, yielded results in 2020 and the vessel-hoisting facilities and maintenance on vessels have contributed to the income of the Group, and were in line with budgeted values.

The compensation received from Government for the use of the temporary relief road currently passing through the Site, as well as the pandemic-related wage supplement have both contributed to the positive results achieved for the year in review. However, it is worth noting that even without these measures, the Group's performance was more than satisfactory in that it managed to achieve a break-even situation in a very challenging and uncertain COVID year.

Directors' report - continued

Outlook for financial year ending 31 December 2021

Notwithstanding the uncertainty brought about by the pandemic in 2020, the maritime sector has proven itself to be a resilient sector that adapted to the pandemic and overcame challenges. Against this context, the Group looks ahead at 2021 with a positive outlook. The Group nonetheless understands the importance in remaining diligent in assessing and mitigating the impact by the ever-present COVID-19 pandemic. The vaccine programmes underway in Malta and in the Group's key markets will surely be a boost to the sector and will facilitate new ways of working.

COVID-19 Pandemic

In its projections for 2021 the Group has factored in that the effects of the Pandemic will carry on throughout 2021.

Group Operations

The Group's current revenue streams that can be segmented as follows:

- Activities related to the Hub, including engineering works;
- Provision of offshore personnel and related logistics; and
- VesselCare activities.

The first two categories are interlinked as they are mainly targeted towards the oil and gas industry, while VesselCare activities consist mainly of maintenance work on yachts and other marine vessels of less than 700 tons, and are independent from the first two categories.

Oil & Gas Operations

As stated above, the price of crude oil has nosedived in 2020 and stabilised towards the end of the year. Consequently, activity in the Mediterranean basin is picking up and bids for oil and gas projects are being issued by several companies in the sector. No major Oil & Gas activity is projected for the Group for 2021. The market is expected to pick up in late 2021 and continuing in 2022. This should eventually also lead to an increase in the recruitment of personnel on offshore rigs and platforms for the Group's logistic and personnel operations.

Commercial Marine Activities

Berthing facilities at the Hub are still in high demand since most commercial marine vessels operating in the Oil & Gas sector are being engaged for projects in the Mediterranean. In this regard, it is envisaged that berthing and berthing support services will not be negatively affected but will remain in high demand even while the pandemic remains present. Crew change protocols are also in place and technical personnel / seafarers can meanwhile be mobilised.

VesselCare Activities

VesselCare activities are currently operating at the budgeted levels and indications are that activity will increase further in 2021, with a longer peak season.

Directors' report - continued

Outlook for financial year ending 31 December 2021 - continued

Cash flow projections

Assuming that the Pandemic will persist throughout most of 2021, the Group has prepared cash flow forecasts taking into consideration a conservative sales-mix and maintaining certain cost-cutting measures taken in 2020.

Cash flow forecasts were prepared for the period ending December 2021 on the basis of a number of assumptions, which were deemed by management to be as realistic as possible with the information and data in hand at the time of approving these financial statements.

The cash flow forecast presented by the Group indicates that sufficient cash will be generated throughout the year to enable the Group to meet its financial commitments, notwithstanding the challenges brought about by the Pandemic.

Financial risk management

The Company's financial risk management objectives and policies, and the exposure to market risk, credit risk and liquidity risk have been disclosed in note 2 of these financial statements.

Results and Dividends

The income statement for the year ended 31 December 2020 is set out on page 13 hereof. No interim dividend was declared or paid out during the year (2019: €Nil). No final dividend is being recommended by the Board of Directors.

Statement of Directors' Responsibilities for the Financial Statements

The directors are required by the Act to prepare financial statements that give a true and fair view of the state of affairs of the Company as at the end of each reporting period and of the profit or loss for that period.

In preparing the financial statements, the directors are responsible for:

- ensuring that the financial statements have been drawn up in accordance with the Accountancy Profession (General Accounting Principles for Small and Medium-Sized Entities) Regulations, Legal Notice 289 of 2015;
- selecting and applying appropriate accounting policies;
- making accounting estimates that are reasonable in the circumstances;
- ensuring that the financial statement are prepared on the going concern basis unless it is inappropriate to presume that the Company will continue in business as a going concern.

The directors are also responsible for designing, implementing and maintaining internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and that comply with the Act. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Directors' report - continued

Statement of Directors' Responsibilities for the Financial Statements - continued

The financial statements of MMH Holdings Limited for the year ended 31 December 2020 are included in the Annual Report 2020, which is published in hard-copy printed form and may be made available on the company's website. The directors are responsible for the maintenance and integrity of the Annual Report on the website in view of their responsibility for the controls over, and the security of, the website. Access to information published on the company's website is available in other countries and jurisdictions, where legislation governing the preparation and dissemination of financial statements may differ from requirements or practice in Malta.

Auditors

PricewaterhouseCoopers have indicated their willingness to continue in office and a resolution for their re-appointment will be proposed at the Annual General Meeting.

On behalf of the Board of Directors

Mr. Paul Abela
Director

Mr. Raymond Ciantar
Director

27 April 2021

Independent auditor's report

To the Shareholders of MMH Holdings Limited

Report on the audit of the financial statements

Our opinion

In our opinion:

- The Group financial statements and Parent Company financial statements give a true and fair view of the Group's and Parent Company's financial position of MMH Holdings Limited (the Company) as at 31 December 2020, and of the Group's and the Parent Company's financial performance and cash flows for the year then ended in accordance with the Accountancy Profession (General Accounting Principles for Small and Medium-sized Entities) Regulations, 2015 and the Schedule accompanying and forming an integral part of those Regulations (GAPSME); and
- the financial statements have been prepared in accordance with the requirements of the Maltese Companies Act (Cap. 386).

What we have audited

MMH Holdings Limited's financial statements, set out on pages 11 to 44, comprise:

- the Consolidated and Parent Company statements of financial position as at 31 December 2020;
- the Consolidated and Parent Company income statements for the year then ended;
- the Consolidated and Parent Company statements of changes in equity for the year then ended;
- the Consolidated and Parent Company statements of cash flow for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group and parent Company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code) together with the ethical requirements of the Accountancy Profession (Code of Ethics for Warrant Holders) Directive issued in terms of the Accountancy Profession Act (Cap. 281) that are relevant to our audit of the financial statements in Malta. We have fulfilled our other ethical responsibilities in accordance with these Codes.

Independent auditor's report - continued

To the Shareholders of MMH Holdings Limited

Other information

The directors are responsible for the other information. The other information comprises the Directors' report (but does not include the financial statements and our auditor's opinion thereon).

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon except as explicitly stated within the *Report on other legal and regulatory requirements*.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the financial statements

The directors are responsible for the preparation of financial statements that give a true and fair view in accordance with GAPSME and the requirements of the Maltese Companies Act, (Cap.386), and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent auditor's report - continued

To the Shareholders of MMH Holdings Limited

Auditor's responsibilities for the audit of the financial statements - continued

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and Parent Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's or the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the company's and group's ability to continue as a going concern. In particular, it is difficult to evaluate all of the potential implications that COVID-19 will have on the Group and Company's trade, customers and suppliers, and the disruption to their business and the overall economy.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

The *Annual Report and Financial Statements 2020* contains other areas required by legislation or regulation on which we are required to report. The Directors are responsible for these other areas.

The table below sets out these areas presented within the Annual Report, our related responsibilities and reporting, in addition to our responsibilities and reporting reflected in the *Other information* section of our report. Except as outlined in the table, we have not provided an audit opinion or any form of assurance.

The notes on pages 17 to 44 are an integral part of these financial statements.

Notes to the financial statements

1. Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

1.1 Basis of preparation

The consolidated financial statements include the financial statements of MMH Holdings Limited and its subsidiaries. The consolidated financial statements have been prepared in accordance with the Accountancy Profession (General Accounting Principles for Small and Medium-Sized Entities) Regulations, Legal Notice 289 of 2015 (GAPSME), and the requirements of the Maltese Companies Act, (Cap.386).

These financial statements have been prepared under the historical cost convention.

Going concern assessment

At 31 December 2020, the Group registered a profit for the year of €387,217 and reported net current liabilities of €3,092,727 and net equity of €4,738,420 in the statement of financial position.

The year under review has been challenging for the company and the Group which was not immune to the COVID-19 pandemic. The cost cutting measures implemented during 2020 and the increase in activity in the last quarter contributed to the positive result attained by the group.

Year 2021 is still challenging, however activity in Oil and Gas industry is picking up and activity in the Group's vessel care division is at its maximum capacity. Although future prospects are positive, management remains cautious. A conservative approach was adopted in the preparation of the group's 2021 budget and cash flows. Based on such information obtained from the group and related letters of support, the directors have determined that the company will have the required resources to continue operations in the forthcoming twelve months. The company is expected to generate sufficient funds to meet its commitments. For this reason, the Directors have adopted a going concern basis in preparing the financial statements.

1.2 Consolidation

(a) Subsidiaries

Subsidiaries are all entities over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

1. Summary of significant accounting policies - continued

1.2 Consolidation - continued

The Group applies the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed (identifiable net assets) in a business combination are measured initially at their fair values at the acquisition date.

Goodwill is initially measured as the excess of the consideration transferred and the amount of any non-controlling interest in the acquiree over the fair value of the Group's share of the identifiable net assets acquired. If this is less than the fair value of the identifiable net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in profit or loss.

Business combinations between entities under common control are accounted for using the predecessor method of accounting. Under the predecessor method of accounting, assets and liabilities are incorporated at the predecessor carrying values, which are the carrying amounts of assets and liabilities of the acquired entity from the consolidated financial statements of the highest entity that has common control and for which consolidated financial statements are prepared. When the controlling party does not prepare consolidated financial statements because it is not a parent Company, the financial statement amounts of the acquired entity are used.

No new goodwill arises in predecessor accounting, and any difference between the consideration given and the aggregate book value of the assets and liabilities (as of the date of the transaction) of the acquired entity, is included in equity in a separate reserve. The financial statements incorporate the acquired entity's results only from the date on which the business combination between entities under common control occurred.

Under both methods of accounting, upon consolidation, inter-company transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated but considered an impairment indicator of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

In the Company's separate financial statements, investments in subsidiaries are accounted for by the cost method of accounting, i.e. at cost less impairment. Cost is adjusted to reflect changes in consideration arising from contingent consideration amendments. Cost also includes directly attributable costs of the investment. Provisions are recorded where, in the opinion of the directors, there is an impairment in value. Where there has been an impairment in the value of an investment, it is recognised as an expense in the period in which the diminution is identified. The results of subsidiaries are reflected in the Company's separate financial statements only to the extent of dividends receivable. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to profit or loss.

Unrealised gains on transactions between the Company and its subsidiary or associate are eliminated to the extent of the Company's interest in the subsidiary or associate. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of the subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Company.

1. Summary of significant accounting policies - continued

1.2 Consolidation - continued

(b) Associates and joint ventures

Associates are all entities over which the Group and Company has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

Investment in associate and interests in joint ventures are accounted for using the equity method, after initially being recognised at cost in the statement of financial position.

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's and Company's share of the post-acquisition profits or losses of the investee in profit or loss, and the Group's and Company's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates and joint ventures are recognised as a reduction in the carrying amount of the investment.

When the Group's and Company's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group and Company does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealised gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

Accounting policies of equity accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group and Company. The Group's and Company's share of post-acquisition profit or loss is recognised in the income statement, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income with a corresponding adjustment to the carrying amount of the investment. When the Group's and Company's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group and Company does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

The carrying amount of equity-accounted investments is tested for impairment in accordance with the policy described in note 1.7. The Group and Company determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group and Company calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount adjacent to 'share of profit/(loss) of associates in the income statement.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to profit or loss where appropriate. Dilution gains and losses arising in investments in associates are recognised in the income statement.

A listing of the Group's and Company's principal associates is set out in note 7 to these financial statements.

1. Summary of significant accounting policies - continued

1.3 Foreign currency translation

(a) Functional and presentation currency

The Group's financial results and financial position are measured in the functional currency, i.e. euro ("€"), which is the currency of the primary economic environment in which the Company operates. Items included in the financial statements of each of the Group's entities are measured using the respective entity's functional currency. These consolidated financial statements are presented in euro ("€"), i.e. the presentation currency, which is the currency in which the Company's share capital is denominated.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the income statement within 'finance income or cost'. All other foreign exchange gains and losses are presented in the income statement within 'other income/(expense)'.

(c) Group companies

Income statements of foreign entities are translated into the Group's presentation currency at the average exchange rates for the year and statements of financial position are translated at the exchange rates ruling at year-end. All resulting translation differences are recognised in other comprehensive income.

Exchange differences arising from the translation of the net investment in foreign entities and of borrowings are taken to other comprehensive income. On disposal of a foreign entity, such translation differences that were previously recognised in other comprehensive income are recognised in profit or loss as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Translation differences are recognised in other comprehensive income.

1.4 Intangible assets

(a) Licences

Separately acquired licences are initially shown at cost. Upon commissioning, these costs are amortised over their estimated useful lives of fifteen to twenty years.

(b) Course development

Courses development is capitalised on the basis of the costs incurred to develop a course and to ensure that it meets the prescribed standards. These costs are subject to amortisation over a period of 5 years.

1. Summary of significant accounting policies - continued

1.5 Property, plant and equipment

All property, plant and equipment is initially recorded at cost. All property, plant and equipment is subsequently stated at historical cost less depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items. These include ground rents due on uncommissioned leasehold land. Borrowing costs are recognised in profit or loss as incurred, in accordance with accounting policy note 1.20.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

Freehold land is not depreciated as it is deemed to have an indefinite life. Depreciation on other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

	%
Leasehold land and improvements to premises	1 - 2
Plant and equipment	20
Furniture and fittings	10 - 25
Motor vehicles	20

No depreciation is charged on assets in the course of construction since the assets have not yet been brought into use. Leasehold land and related improvements included within land and buildings (refer below) are depreciated over the remaining term of the lease.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with carrying amount and are recognised in profit or loss.

1.6 Investment property

The Company owns investment property, principally comprising the land in Marsa held under temporarily emphyteutical grants and is not occupied by the Company but rented out to its subsidiary. This property is included as property, plant and equipment in the Group accounts.

Investment property is measured initially at its historical cost, including related transaction costs. Historical cost includes expenditure that is directly attributable to the acquisition of the items. These include ground rents due on uncommissioned leasehold land. Borrowing costs are recognised in profit or loss.

Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to profit or loss during the financial period in which they are incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

After initial recognition, investment property is carried at historical cost, less subsequent depreciation for buildings, and impairment.

1. Summary of significant accounting policies - continued

1.6 Investment property - continued

Freehold land is not depreciated as it is deemed to have an indefinite life. The commissioned capitalised cost of improvements is amortised using the straight-line method over the remaining term of the lease and in accordance with the term of the lease. Useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

A property's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Investment properties are derecognised either when they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Gains and losses on disposals are determined by comparing the proceeds with carrying amount and are recognised in profit or loss.

If an investment property becomes owner-occupied, it is reclassified as property, plant and equipment. Its cost and accumulated depreciation at the date of the reclassification becomes its cost and accumulated depreciation for subsequent accounting purposes. When the Company decides to dispose of an investment property without development, the Company continues to treat the property as an investment property. Similarly, if the Company begins to redevelop an existing investment property for continued future use as investment property, it remains an investment property during the redevelopment.

If an item of property, plant and equipment becomes an investment property because its use has changed, its cost and accumulated depreciation at the date of the reclassification becomes its cost and accumulated depreciation for subsequent accounting purposes.

Where an investment property undergoes a change in use, evidenced by commencement of development with a view to sale, the property is transferred to inventories. A property's deemed cost for subsequent accounting as inventories is its carrying amount at the date of change in use.

1.7 Impairment of investments in subsidiaries, associates and non-financial assets

Investments in subsidiaries, associates and non-financial assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets that suffered impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

1.8 Financial assets

1.8.1 Classification

The Group classifies its financial assets, other than investments in subsidiaries in the loans and receivables category. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments on initial recognition and re-evaluates this designation at every reporting date.

1. Summary of significant accounting policies - continued

1.8 Financial assets - continued

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of trading the asset. They are included in current assets, except for maturities greater than twelve months after the end of the reporting period. These are classified as non-current assets. The Group's loans and receivables comprise trade and other receivables and cash and cash equivalents in the statement of financial position (Notes 1.10 and 1.11).

1.8.2 Recognition and measurement

The Group recognises a financial asset in its statement of financial position when it becomes a party to the contractual provisions of the instrument. All financial assets are initially recognised at fair value plus transaction costs.

Loans and receivables are subsequently carried at amortised cost using the effective interest method.

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership or has not retained control of the asset.

1.8.3 Impairment

The Group assesses at the end of each reporting period whether there is objective evidence that a financial asset or a Group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. The Group first assesses whether objective evidence of impairment exists. The criteria that the Group uses to determine that there is objective evidence of an impairment loss include:

- significant financial difficulty of the issuer or obligor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becomes probable that the borrower will enter bankruptcy or other financial reorganisation; and
- observable data indicating that there is a measurable decrease in the estimated future cash flow from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the Group.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment loss. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

1. Summary of significant accounting policies - continued

1.8 Financial assets - continued

For financial assets carried at amortised cost, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The asset's carrying amount is reduced and the amount of the loss is recognised in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in profit or loss.

1.9 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost includes direct materials, labour and direct overheads incurred in bringing the product to its present location and condition. Net realisable value represents the estimated selling price for inventories, less all estimated costs of completion and costs necessary to make the sale.

1.10 Trade and other receivables

Trade receivables comprise amounts due from customers for merchandise sold or services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in profit or loss. When a receivable is uncollectible, it is written off against the allowance account for trade and other receivables. Subsequent recoveries of amounts previously written off are credited against profit or loss.

1.11 Cash and cash equivalents

Cash and cash equivalents are carried in the statement of financial position at face value. In the statement of cash flows, cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the statement of financial position.

1.12 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new ordinary shares are shown in equity as a deduction, net of tax, from the proceeds.

1.13 Financial liabilities

The Group recognises a financial liability in its statement of financial position when it becomes a party to the contractual provisions of the instrument. Financial liabilities are recognised initially at fair value, including transaction costs. These liabilities are subsequently measured at amortised cost. The Group derecognises a financial liability from its statement of financial position when the obligation specified in the contract or arrangement is discharged, is cancelled or expires.

1. Summary of significant accounting policies - continued

1.14 Trade and other payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

1.15 Grants designated for specific purposes

Grants are recognised in the statement of financial position initially as deferred income when there is reasonable assurance that they will be received and that the group will comply with the conditions attaching to them.

Grants that compensate the Group for expenses incurred are recognised in the income statement on a systematic basis in the same reporting periods in which the expenses are incurred. This compensation is disclosed in the same reporting line as the related expense.

Grants that compensate the group for the cost of an asset are recognised in the income statement on a systematic basis over the useful life of the asset to match the depreciation charge. Capital grants are recorded as deferred income and released to the income statement over the estimated useful life of the related assets.

1.16 Borrowings

Borrowings are recognised initially at the fair value of proceeds received, net of transaction costs incurred. Borrowings are subsequently carried at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

Issue costs incurred in connection with the issue of the bonds include professional fees, publicity, printing, listing, registration, underwriting, management fees, selling costs and other miscellaneous costs.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period.

1.17 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

1.18 Current and deferred tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised directly in equity. In this case, the tax is also recognised directly in equity.

1. Summary of significant accounting policies - continued

1.18 Current and deferred tax - continued

Deferred tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax arises on temporary differences on non-current assets, provisions, trading losses and investment tax credits.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

1.19 Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is recognised upon delivery of products or performance of services, and is stated net of sales tax, returns, rebates and discounts.

The Group recognises revenue when the amount of revenue can be reliably measured, when it is probable that future economic benefits will flow to the entity and when specific criteria have been met for each of the Group's activities as described below.

(a) Sales of services

Revenue from services is generally recognised in the period the services are provided, based on the services performed to date as a percentage of the total services to be performed. Accordingly, revenue is recognised by reference to the stage of completion of the transaction under the percentage of completion method.

(b) Interest income

Interest income is recognised on a time-proportion basis using the effective interest method.

(c) Dividend income

Dividend income is recognised when the right to receive payment is established.

1.20 Borrowing costs

Borrowing costs are recognised in profit or loss as incurred.

1. Summary of significant accounting policies - continued

1.21 Dividend distribution

Dividend distribution to the company's shareholders is recognised as a liability in the Group's and the company's financial statements in the period in which the dividends are approved for distribution.

2. Financial risk management

2.1 Financial risk factors

The Group's activities potentially expose it to a variety of financial risks: market risk (including cash flow interest rate risk and foreign exchange risk), credit risk and liquidity risk. The Group's overall risk management focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group did not make use of derivative financial instruments to hedge risk exposures during the current and preceding financial years. The board provides principles for overall risk management, as well as policies covering risks referred to above and specific areas such as investment of excess liquidity.

(a) Market risk

(i) Foreign exchange risk

Foreign currency transactions arise when the company buys or sells goods or services of which are denominated in a foreign currency, borrows or lends funds when the amounts payable or receivable are denominated in a foreign currency. As at year-end, the Group has receivables and cash balances amounting to €147,552 (2019: €348,438) denominated in Egyptian pound and €40,814 (2019: €52,541) denominated in Israeli Shekel as a result of an operational contractual agreement. These assets denominated in foreign currency are current in nature and are expected to be recovered in the next twelve months.

(ii) Cash flow interest rate risk

As the Group has no significant variable interest-bearing assets, the Group's income and operating cash flows are not dependent of changes in market interest rates. The Group has interest bearing assets from parent related parties that carry a fixed rate of interest. As at 31 December 2020, the Group was exposed to bank borrowings issued at variable rates. The Group also has bond borrowings carrying a fixed rate of interest (note 13). Management monitors the impact of changes in market interest rates on amounts reported in profit or loss in respect of these instruments.

Based on the above, management considers the potential impact on profit or loss of a defined interest rate shift that is reasonably possible at the end of the reporting period to be immaterial.

2. Financial risk management - continued

2.1 Financial risk factors - continued

(b) Credit risk

Credit risk arises from cash and cash equivalents, deposits with banks, as well as credit exposures to customers, including outstanding receivables and committed transactions. The Group's exposure to credit risk is analysed as follows:

	Group	
	2020	2019
	€	€
Carrying amounts		
Trade receivables - net	5,508,485	4,110,691
Amounts due from parent	885,063	902,933
Other receivables	258,381	615,105
Indirect taxation	-	190,196
Cash and cash equivalents (Note 10)	1,910,438	1,030,097
	8,562,367	6,849,022

The maximum exposure to credit risk at the end of the reporting period in respect of the financial assets mentioned above is equivalent to their carrying amount. The Group does not hold any collateral as security in this respect.

The Group banks with local financial institutions with high quality standing or rating. Bank balances denominated in Egyptian pound are held with a foreign financial institution.

Financial assets which potentially subject the Group to concentrations of credit risk are trade receivables. This is due to the fact that the Group's trade receivables are almost entirely made up of a limited number of major customers. The Group has policies in place to ensure that sales are made to customers with a proven credit history. The Group monitors the performance of these financial assets on a regular basis to identify incurred collection losses which are inherent in the Group's receivables taking into account historical experience in collection of accounts receivable.

The Group manages credit limits and exposures actively in a practicable manner such that there are no material past due amounts receivable from customers as at the end of the reporting period.

The Group had no impaired balances at 31 December 2020 (2019: €20,127). The Group does not hold any collateral as security for the impaired assets or past due but not impaired debts.

The Group's receivables include amounts due from parent (refer to note 9). The Group's treasury monitors related party credit exposures at individual entity level on a regular basis and ensures timely performance of these assets in the context of overall Group liquidity management. The Group assesses the credit quality of all the related parties taking into account financial position, performance and other factors. An amount of €345,212 (2019: €345,212) owed by related parties are guaranteed by the ultimate controlling party and after taking cognisance of the related party relationship management does not expect any losses from non-performance or default.

2. Financial risk management - continued

2.1 Financial risk factors - continued

(c) Liquidity risk

The Group is exposed to liquidity risk in relation to meeting future obligations associated with its financial liabilities, which comprise principally trade and other payables and interest-bearing borrowings (refer to notes 14 and 13 respectively). Prudent liquidity risk management includes maintaining sufficient cash and committed credit lines to ensure the availability of an adequate amount of funding to meet the Group's obligations.

The following tables analyse the Group's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within twelve months equal their carrying balances, as the impact of discounting is not significant.

	Carrying amount €	Contractual cash flows €	Within one year €	One to five years €	Over five years €
31 December 2019

Net book amount	20,331,293	3,919,172	3,207,747	368,565	127,898	27,954,675

The improvement to premises includes capitalised labour costs of €231,420 (2019: €402,961).

In 2016, the Group acquired land measuring circa 170,000 square meters on a title of temporary emphyteusis grant for 65 years through a successful competitive tender bidding process. The infrastructural works carried out by the Group, which include dredging and construction works, significantly enhanced the value of the land, with the aim of increasing the Group's revenues as a result of enhancing its ability to attract business. The directors therefore expect that the value of the land should, subject to these expectations being met, increase significantly. Nevertheless, for the time being, they consider it appropriate to measure the land in the financial statements at its historical cost, which comprises preliminary costs, capitalised ground rents due on uncommissioned land and the cost of the infrastructural works being carried out. The directors will continue to assess the value of the land on an ongoing basis, with particular reference made to the level of business attracted as the works are completed.

As at 31 December 2020, assets amounting to €3,919,172 (2019: €5,525,172) have not been brought into use and are therefore not being depreciated. These are classified as assets under construction.

Prepayments and accrued income	690,826	684,375	595,445	595,445
	6,457,692	5,600,367	597,035	601,335
Total trade and other receivables	7,342,755	6,503,300	8,379,169	7,629,943

The amounts due from subsidiaries are unsecured, interest free and have no fixed date of repayment, but are not expected to be received in the next twelve months. Amounts due from parent totalling €345,212 (2019: €345,212) are unsecured, carry interest at 5% and are repayable in 2026.

Movements in non-current trade and other receivables relate to advances made by the Group to the parent and net advances received by the Company from its subsidiaries.

10. Cash and cash equivalents

For the purposes of the statement of cash flows, cash and cash equivalents comprise the following:

	Group		Company	
	2020	2019	2020	2019
	€	€	€	€
Cash at bank and in hand	1,910,438	1,030,097	7,532	1,212
Bank overdraft	(2,050,254)	(2,037,243)	(2,050,254)	(2,037,243)
	(139,816)	(1,007,146)	(2,042,722)	(2,036,031)

11. Share capital

	Group & Company	
	2020	2019
	€	€
Authorised, issued, called-up and fully paid		
500,000 ordinary shares class A of €1 each	500,000	500,000
500,000 ordinary shares class B of €1 each	500,000	500,000
	1,000,000	1,000,000

'A' class and 'B' class shares shall each be entitled to appoint up to three members to the Board of Directors. All ordinary shares, whatever the letter by which they are denominated shall rank *pari passu* and each share should give the right to one vote.

12. Deferred taxation

Deferred income taxes are calculated on temporary differences under the liability method and are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled based on tax rates (and tax laws) that have been enacted by the end of the reporting period. The principal tax rate used is 35% (2019: 35%).

The movement on the deferred tax account is as follows:

	Group	
	2020	2019
	€	€
At beginning of year	336,531	338,313
<i>Recognised directly in profit or loss</i>		
Deferred tax charge for the year (Note 23)	(287,140)	(1,782)
At end of year	49,391	336,531

The balance at 31 December represents:

	2020	2019
	€	€
Temporary differences arising on depreciation of property, plant and equipment	(716,954)	(677,506)
Temporary differences on unutilised capital allowances	314,827	584,539
Temporary differences arising on trading tax losses	100,615	116,700
Temporary differences on unutilised tax credits	350,903	312,798
Net deferred tax assets	49,391	336,531

At 31 December 2020, the Group had unrecognised deferred tax assets of €Nil (2019: €1,041,584) arising from unabsorbed capital allowances, unutilised trading tax losses and temporary differences on property, plant and equipment that have not been recognised in the financial statements due to the uncertainty of the tax benefits through future taxable profits, related to the specific group undertaking and its activity.

13. Borrowings

	Group		Company	
	2020 €	2019 €	2020 €	2019 €
Non-current				
15,000,000 4.8% bonds 2026	14,772,479	14,741,187	-	-
Bank loans	5,046,117	4,907,937	3,696,338	3,501,630
Loan from subsidiary	-	-	1,800,000	1,800,000
Other borrowings	-	425,000	-	-
Total non-current	19,818,596	20,074,124	5,496,338	5,301,630
Current				
Bank loans	314,731	359,083	206,306	359,083
Bank overdraft	2,050,254	2,037,243	2,050,254	2,037,243
Other borrowings	425,000	-	-	-
Total current	2,789,985	2,396,326	2,256,560	2,396,326
Total borrowings	22,608,581	22,470,450	7,752,898	7,697,956

At 31 December 2020, the Group and Company have banking facilities of €8,004,119 (2019: €8,870,120) which is secured by a guarantee in the form of a grant from Malta Enterprise and a guarantee over properties owned by the ultimate shareholder. The overdraft facility, included in the above banking facilities, is of €2,000,000 (2019: €2,000,000).

The loan from subsidiary is unsecured, carries interest at 5.95% and is repayable in 2026.

The contracted undiscounted cash flows of the non-current bank loans analysed into relevant maturity groupings based on the remaining period at the reporting date to the maturity date is disclosed in note 2.

The unsecured bonds are measured at the amount of the net proceeds adjusted for the amortisation of the difference between the net proceeds and the redemption value of such bonds, using the effective yield method as follows:

	Group	
	2020 €	2019 €
Face value		
15,000,000 4.80% bonds 2026	15,000,000	15,000,000
	15,000,000	15,000,000
Issue costs	(354,188)	(354,188)
Accumulated amortisation	126,667	95,375
Closing net book amount	(227,521)	(258,813)
Amortised cost at 31 December	14,772,479	14,741,187

13. Borrowings - continued

By virtue of an offering memorandum dated 16 September 2016, the Group issued €15,000,000 bonds with a face value of €1,000 each. The bond's interest is payable annually in arrears on 14 October. The bonds are redeemable at par and are due for redemption on 14 October 2026 but the issuer may at any time purchase Bonds in the open market or otherwise at any price. The bonds are guaranteed by MMH Holdings Limited, which has bound itself jointly and severally liable for the payment of the bonds and interest thereon, pursuant to and subject to the terms and conditions in the offering memorandum. The bonds have been admitted on the Official List of the Malta Stock Exchange on 19 October 2016. The quoted market price as at 31 December 2020 for the bonds was €100 (2019: €102). In the opinion of the directors these market prices fairly represent the fair value of these financial liabilities.

The interest rate exposure of the borrowings of the Group was as follows:

	Group	
	2020	2019
Total borrowings:		
Unsecured bonds	4.80%	4.80%
Bank loans	4.50%	4.20%
Bank overdraft	5.00%	5.00%

This note provides information about the contractual terms of the Group's borrowings. For more information about the Group's exposure to interest rate and liquidity risk, refer to note 2.

14. Trade and other payables

	Group		Company	
	2020	2019	2020	2019
	€	€	€	€
Non-current				
Amounts due to subsidiaries	-	-	636,438	529,046
Amounts due to related parties	-	-	1,208,156	1,171,929

Total trade and other payables	8,755,959	7,653,694	7,018,043	5,731,513

In the Company's books, the amounts due to subsidiaries and related parties are unsecured, interest free and have no fixed date of repayment, but are not expected to be repaid within the next twelve months.

15. Grants designated for specific purposes

	Group	
	2020	2019
	€	€
Year ended 31 December		
Opening net book amount	2,090,924	1,747,871
Allocation of grant for the year	80,623	384,500
Amortisation for the year	(82,538)	(41,447)
	2,089,009	2,090,924
Closing net book amount	2,089,009	2,090,924
	2020	2019
	€	€
Disclosed as:		
Current	86,426	42,980
Non-current	2,002,583	2,047,944
	2,089,009	2,090,924

As at 31 December 2020, grants amounting to €2,089,009 (2019: €2,090,924) relating to funds advanced directly by the Government of Malta through its agent Malta Enterprise for the co-financing its capital expenditure of the property, plant and equipment. These funds are treated as deferred income and are credited to profit or loss on a systematic basis over the useful lives of the assets. The impact of these grants on the current year's results is disclosed in note 17.

16. Revenue

All the Group's revenue was derived from the provision of specialised services, as well as related ancillary services, to the marine and oil and gas industry in the local market of Malta together with the provision of other ancillary services.

	Group		Company	
	2020	2019	2020	2019
	€	€	€	€
Rendering of services	14,866,746	17,347,067	-	-

Trade and other payables	1,102,265	(541,542)	1,286,530	316,168
Cash from/(used in) operations	3,382,422	2,799,899	972,351	(945,588)

26. Related party transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. The company has control over all the companies forming part of the MMH Group of Companies. All companies forming part of this Group are considered as related parties. Trading transactions between these companies include items which are normally encountered in a Group context. The Group is ultimately fully owned by Paul Abela, through an immediate parent, Elosolar Company Limited. Both parties are therefore considered to be related parties. Companies owned directly by Paul Abela are also considered to be related parties.

Year-end balances with related parties are disclosed in notes 9 and 14 to the financial statements.

The following transactions were carried out with related parties:

	Group		Company	
	2020	2019	2020	2019
	€	€	€	€
Rental income from subsidiary	-	-	1,906,757	1,260,767
Interest payable to subsidiary	-	-	(107,393)	(106,806)
Interest income from parent	17,261	17,261	-	-

Key management personnel compensation including directors' remuneration is disclosed within note 18 and amounts to €290,190 (2019: €419,473). Directors' emoluments are disclosed separately in note 24.

27. Statutory information

MMH Holdings Limited is a limited liability company and is incorporated in Malta.

The immediate parent company of MMH Holdings Limited is Elosolar Company Limited, a company registered in Malta, with its registered address at Mediterranean Maritime Hub Building, Xatt il-Mollijiet, Marsa. This company is fully owned by Paul Abela.

The ultimate controlling party of MMH Holdings Limited is Mr. Paul Abela.

28. Comparative information

Comparative figures disclosed in the main components of these financial statements have been reclassified to conform with the current year's presentation format for the purpose of fairer presentation.
